

Coding Solutions

Amphion Medical Solutions is offering a full range of coding support services. Whether you need short-term or long-term help, we have the solution. As HIM professionals, we realize your needs are often unpredictable and can quickly create stressful situations for you and your staff. Therefore we have developed a package of coding solutions to fit any need.

Scan 'n Go™ will offer you a fast and easy way to eliminate those irritating coding backlogs. Scan 'n Code™ will offer you an easy, turn-key solution for your ongoing coding vacancies or backlogs.

We include scanners and abstracting capabilities! If you prefer traditional, on-site coding support, we can offer you that service.

Total outsourcing of your coding needs is also available.

Amphion Medical Solutions is a privately owned company that offers hands-on, personal support for our clients. The Amphion management team consists solely of past HIM Directors. We know how to serve you and what you will expect. All Amphion coders are tested, evaluated, and monitored for ongoing quality. Each Amphion coder has significant years worth of relevant and current coding experience in your area of need.

We know firsthand how to pay attention to every detail, and deliver the highest-quality product available. For more information, and a list of satisfied clients, please call. Amphion is ready to help you immediately!
