

# Quality Transcription Services

**Amphion Medical Solutions** has both the latest technology and the dedicated people to provide your institution with the very best, most cost effective transcription outsourcing solution.

Whether it is an overflow need, a partial outsource need or a desire to totally outsource your transcription, the experienced professionals at **Amphion Medical Solutions** are ready to deliver. We have the ability to efficiently capture the voice directly from your institution's dictation system or assign to your dictators direct access to our digital dictation system via a toll free number.

Our experienced healthcare professionals work with you to customize an outsourcing program that fits your needs both in cost and functionality while always achieving established turnaround times.

Any company can re-record dictation from your digital dictation system to theirs, but at **Amphion Medical Solutions** we feel that is only the beginning. You need your transcription returned in a timely manner and error free. By adhering to a Quality Management program unmatched in our industry, we ensure that all work delivered to our clients is of the highest possible quality. We also work with you to ensure the work is returned in the format that your institution needs and expects.

The electronic return of the completed transcription to your institution is driven by your needs while complying with the latest HIPAA mandates. If you desire your completed transcription uploaded directly into your HIS, **Amphion Medical Solutions** has an experienced I/S department that works closely with your institution's I/S department to establish an acceptable interface.

For additional information, or to schedule a meeting with one of our transcription specialists, call **1-888-830-2644**.

- ◆ Totally HIPAA Compliant
